Certifications

CompTIA Security+

Previous Projects

Van Buren Township Fire Department Website

Spring 2018 - Fall 2018

- Used the languages ASPX, Visual Basic and HTML to create and edit a website that the Van Buren Township Fire Department used to connect with the community. Users were able to find townhall meeting times, information on past meetings, along with documents that users could download and use to obtain assistance from the township.

Capstone (Pet Net)

Fall 2017 – Spring 2018

- Worked with other Informatics majors who specialized in different disciplines to create a website that connected pet owners. Users were able to use location services to find the nearest dog park, veterinarian, dog food, and any other pet related service. During this project, I utilized HTML, CSS, SQL, PHP and JavaScript, and had to complete the project working in a group environment.

Final Project Web Development (Personal Website)

Spring 2016 – Spring 2018

- Used languages including CSS, HTML, and JavaScript to create a web page that describes and gives links to different projects that I had accomplished, my contact information, along with a copy of my resume. This website can be found at: <https://adriennenc.github.io/portfolio/>

I101 Task (Societal Transformation)

Spring 2015

- Collaborated with group members to develop a website that gave insight into the making of services that provide low-income families with access to technology and the Internet.

Work Experience

SAIC, Crane, IN

July 2021 – December 2021

Software Systems Engineer

- Developed and edited websites to fit user needs utilizing ColdFusion, HTML, and SQL
- Helped troubleshoot and solve user issues within the Asset Tracking System website using both Internet Explorer and Microsoft Office software
- Built Item Unique Identification kits using the ErrorProof software, portable scanners, Microsoft Office, and label printers

- Wrote user interface training documents with step by step instructions for the Asset Tracking System
- Developed and generated specialized reports using SQL in support of Government customers and upper management.

CACI International INC, Crane, IN

September 2018 – July 2021

Software Developer T1

- Developed and edited websites to fit user needs utilizing ColdFusion, HTML, and SQL
- Helped troubleshoot and solve user issues within the Asset Tracking System website using both Internet Explorer and Microsoft Office software
- Built Item Unique Identification kits using the ErrorProof software, portable scanners, Microsoft Office, and label printers
- Wrote user interface training documents with step by step instructions for the Asset Tracking System
- Developed and generated specialized reports using SQL in support of Government customers and upper management.

Residential Programs and Services, Bloomington, IN
